Lecture by Luis de Guindos: “Is Spain’s economy vulnerable?”

Event organized jointly with the Centre for the Finance Sector of PwC-IE Business School.

The lecture, delivered by Don Luis de Guindos, Director of the Centre for the Finance Sector of PwC-IE Business School and former Secretary of State for Economic Affairs, dealt with the economic and financial perspectives of Spain’s economy, given the current uncertain financial and economic situation of the country. The difficult

question of “Is Spain’s economy vulnerable?” was particularly relevant after the financial bail-out of Portugal.

Given the undoubted importance of the question today and the prestige of the speaker, the event was attended by 190 people.
